Artists who wish to accentuate the subtle changes of the **Classical** tone colors from note to note without compromising the accurate rendering of intervals will find the Concept behind designing the **Classical Headjoint**: The principle acoustic design for the **Classical Head Joint** is based on the concept of Bel Canto Singing. It is a perfect champion to artists of *Messa di voce*, the natural evolution from the Baroque style.

The **New Voice C Flute GH** blends the affordability of the New Voice line with the masterful tone of the Grenaditte line by upgrading key areas of the instrument to high density Grenaditte. The headjoint and footjoint of this instrument has been manufactured with the same extremely dense material found in our professional models.

The **New Voice C Flute** is a wonderful choice for musicians looking to enhance tonal quality, lower instrument weight, and connect more to their music through increased musical feedback. Imagine you won't not only be able to hear what you're playing, but you'll feel it also through the pleasing natural vibration this material offers. The additional heightened perception allows our musicians to be more connected to their music in ways they did not know was possible, primarily because this connection is not possible with traditional metal flutes. While the material used in the production of the New Voice line is not as dense as the material used in our professional models, the New Voice line still offers some of the same great features. The New Voice line will excite and fill with admiration even the most critical player.

Shining Piper
Innovative
Creative
Futuristic

The **Shining Piper** is the best instrument for children or beginners in the market today. Although its design is sure to dazzle the eye and excite any child, it is a serious instrument and a great learning tool. The model pictured above (wooden finish) is the only version to offer a variety of color choices for the crystals attached to the keys.

All of the other (colored) versions of the Shining Piper come with clear crystals only.

New headjoint and body design
